

MAXTACT TRAINING AND LESS LETHAL MARKER PACKAGES:

All bellow packages will include the following point to them. All these come with the Mil/Le marker package any additions to the kits will be of extra cost.

1. One year no haste repair clause. If you have any issues with the product that where caused by malfunction or wear the product will be replace within 48hr. All issues will be covered (short of neglect from the owners)
2. In stock wearable parts. This includes orings, bolts and hard ware that will be provided to the unit for the year (based on a 10% calculation of parts being used with general day to day wear)
3. A Mactact service course will be provided via Skype if face to face is not a viable option in order to train your group to properly maintain the equipment (such as day to day lubrication and minor wearable parts replacement)
4. Proper lube for the units will be provided (one can per 4 markers based on day to day use for one year)

Here are some of the options that we can help you with when it comes to the markers.

- Sights
- Cases (Pelican style cases)
- Grips
- Air tanks (either scuba to use as fill stations or CO2/HPA for the markers)
- Mask for your group (either full face that is recommended or eye protection only)
- ETC

The kits are based on the TGR2 CQB marker. We have a full range of markers from CQB style to DMR that can be provided for your use. The marker kit will include one marker, six 18rd magazines, one 13cu Tank, seal kit.

Some of the features that our markers have are:

- 0.68 Cal. Open Bolt Semi-Auto Magazine Fed Paintball Marker
